

Presentation

Present your research to the class. Your presentation should

- contain a “hook” meant to draw your audience to your question
- contain all the content and findings in the previous stages
- communicate your findings in a precise, well-structured and engaging manner
- take into account my feedback at every stage
- rely on a handout, visual aid or any other device you deem appropriate
- 5-7 minutes (if you work alone) or 10-12 (if you work in groups of 2-3)
